

Al Zerwa

Trading Co. L.L.C

fluid displacement solutions

Company Profile

Al Zerwa Trading Co.LLC (AZT) was inducted in the year 2003 with the sole promise to deliver quality Valves , Pipes , Pipe fitting , Hydraulic clamp , Hydroline products and all others Oilfield items and this promise has been fulfilled to a great extent which is evident as we have grown to be the leading suppliers in this sector and we have also developed our stocks and client in GCC in collaboration with major European & American manufacturers around the globe strongly supporting our organization with product support and special productions covering the complete range of piping materials. We have exported all our products on a large scale basis to more than 30 countries. We have mellowed over the years as a trusted company and highly valued by foreign customers due to our high - quality products and strong international reputation in industries related to the Oil & Gas & Petrochemical.

Stocking Facilities

We have a wide range of stocks which we keep expanding at our warehouse facility located in Al Rashidiya, Umm Ramool, and Near Duty Free Warehouse Dubai (U.A.E). We stock materials of European and Japanese manufactures which are certified by their respective Mills in accordance to relevant international standards and all materials conform to Nace MR-01-75. Our Stock and Liaisons with reputed manufactures, stockiest and suppliers from around the globe enables our experienced sales staff to offer and supply materials for complete project packages to our clients at competitive prices and deliveries. We are regular and potential supplier of stocks and on forward delivery basis to our customers in the UAE as well as other GCC countries.

Our Mission

To become a premium provider and leader offering highest quality products & services in Oil & Gas Industry, Construction, Marine and Power Utility sectors in the middle east region with integrity commitment and a professional approach.

Our Vision

The prime motto being not only to make money on our own but also to make our clients & principals equally successful in all our business deals. The core of our success is mutually beneficial long term business relationship between our clients & principals. Our Experienced and resourceful team are trained to give the technical support of the products and capable in fulfilling your original requirements with most competitive price and high quality services in very short span of time. We assure that Al Zerwa Trading Co.LLC will provide you with nothing but the best of quality materials and services.

PRODUCTS

GATE VALVES (In SS, CS, Ductile Iron)

BALL VALVES (In SS, CS, Ductile Iron)

GLOBE VALVE (In SS, CS, Ductile Iron)

CHECK VALVE (In SS, CS, Ductile Iron)

BUTTERFLY VALVE (Wafer type, Lug type, Flange type with lever operated and gear operated valves in Cast iron body available in ductile iron, SS 304 and SS 316 disc)

Sizes range from 1/2" to 48".

Available in Screwed end and Flange end for their respective sizes.

Pressure Rating: CL150 to CL1500
PN10 to PN40

AMS VALVES

AMS Valves have established themselves as the market leader when it comes to valve supplying to the oil, petrochemical, gas and power generation industries this claim is established on the basis of an extraordinary service rendered and the reputation built over the last decade. Today, by combining the stocks of a wide range of valves with in-depth technical expertise in their specification and use, we are relied upon as the leading valve suppliers to source and modify valves that precisely meet the requirements and deadlines set by our customers. AMS offer their clients the distinct advantage by meeting the widest range of valve requirements as a single source valve supplier.

We understand technical requirements and appreciate the importance of project deadlines. We can provide valuable support to clients from initial specification to on site delivery. We ensure correct product, documentation and express delivery to make the sourcing operation efficient, helping our clients reduce their costs

PRODUCTS

GATE VALVES (In Forged Steel, CS & SS)

BALL VALVES (In Forged Steel, CS & SS)

GLOBE VALVE (In Forged Steel, CS & SS)

CHECK VALVE (In Forged Steel, CS & SS)

Y Strainers (In CS & SS)

BUTTERFLY VALVE (Wafer type, Lug type, Flange type with lever operated and gear operated valves in Cast iron body available in ductile iron, SS 304 and SS 316 disc)

Sizes range from 1/2" to 48".

Available in Screwed end and Flange end for their respective sizes.

Pressure Rating: CL150 to CL1500
PN10 to PN40

SVS VALVES

Is a multinational company which specializes in manufacturing high quality industrial valves. The expertise and know-how acquired over the years coupled with the continued investments in the design of valves, has made SVS a world renowned company in the field of valve application. SVS develops and designs valves for all applications but the main focus being the oilfield sectors. SVS valves are designed and produced to meet the major international standards and we put a lot of emphasis on quality, which guarantees a trouble free operation of our products. In addition we take great care to make our facilities and our products environment friendly. Fundamental to the company's approach to oil field supplies is the philosophy to stock. we recognize the importance of fast and reliable delivery and due to maintaining the largest and most comprehensive valve stock, we have naturally become the first choice among end users and suppliers for off-the-shelf requirements. The stocks are constantly monitored to ensure that they are maintained at suitable levels.

PRODUCTS

GATE VALVES (A-351 CF8M SS316,A-351 CF3M SS316L)

BALL VALVES (A-351 CF8M SS316,A-351 CF3M SS316L)

GLOBE VALVE (A-351 CF8M SS316,A-351 CF3M SS316L)

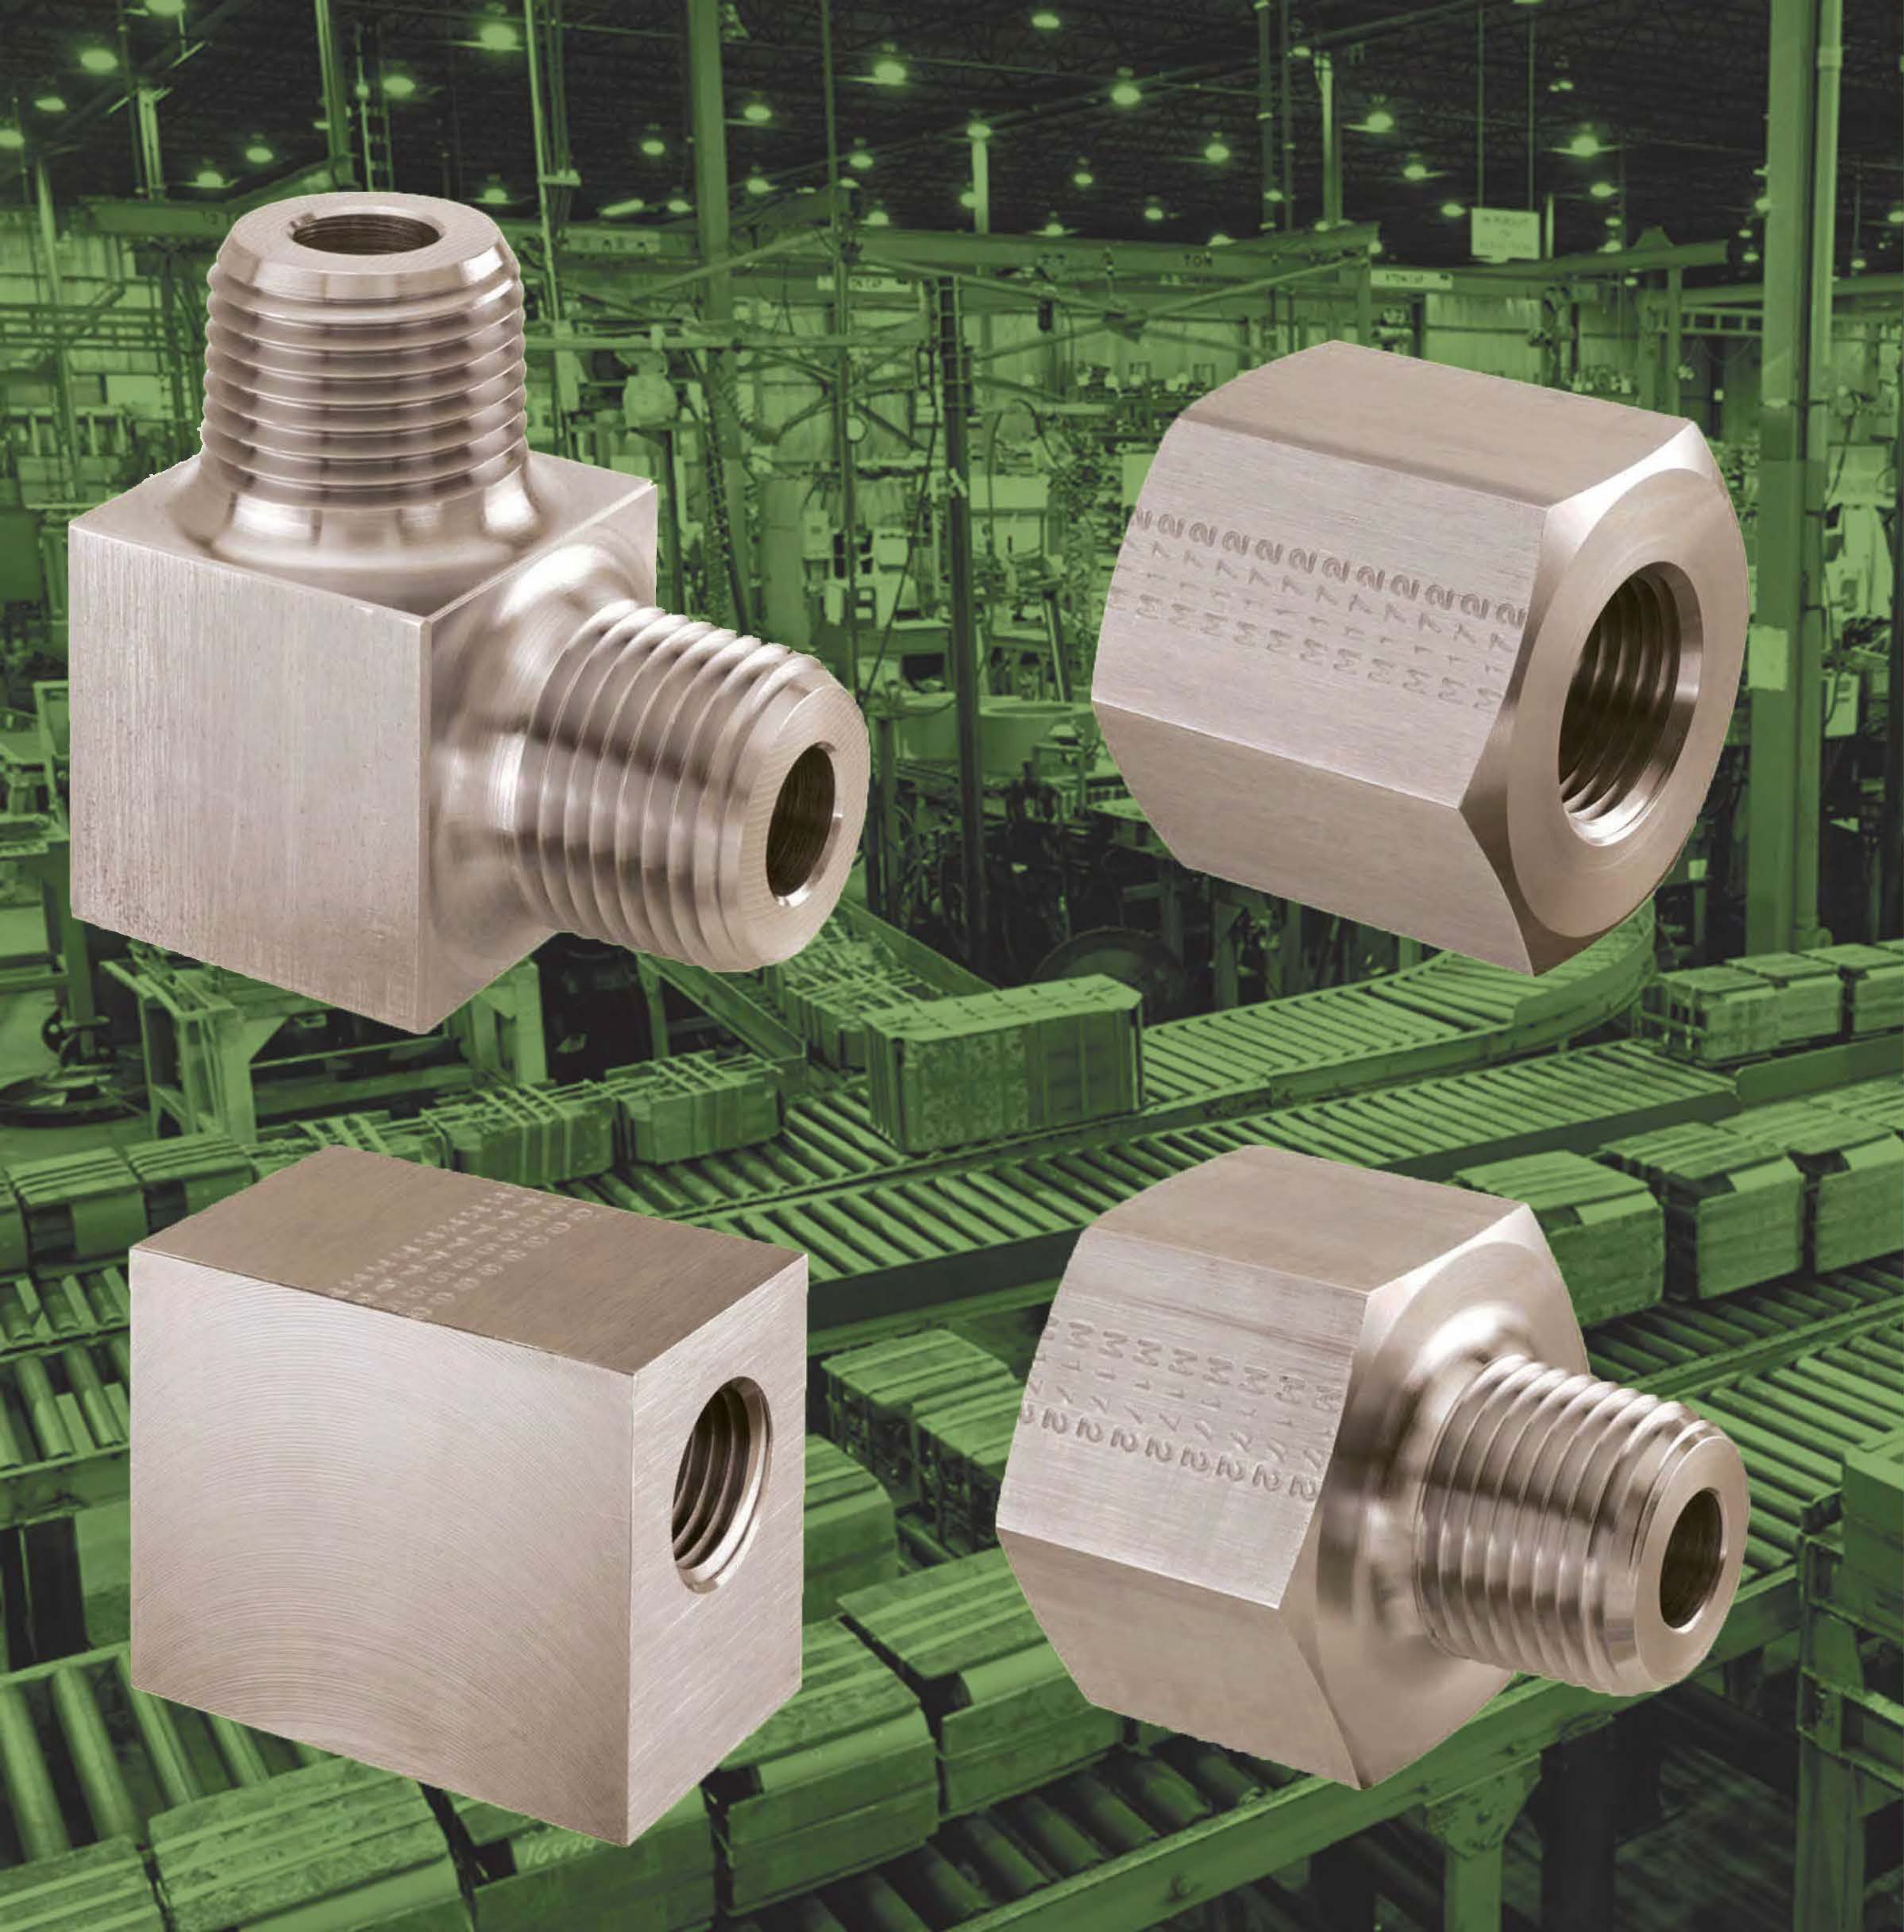

CHECK VALVE (A-351 CF8M SS316,A-351 CF3M SS316L)

BUTTERFLY VALVE (Wafer type, Lug type, Flange type with lever operated and gear operated valves in Cast iron body available in ductile iron, SS 304 and SS 316 disc)

VALTEC

We are pleased to introduce VALTEC, a brand from Tiwan that specialises in valves and manufacture quality valves of almost all types for a wide spectrum used in the Process and Chemical, Refineries & Petrochemicals, Fertilizers, Drugs and Pharmaceuticals, Thermal Power Stations, Nuclear and Atomic Power Stations, Textiles, Dyes and Intermediates, Paints & Varnishes, Sugar, Breweries and Distilleries, Soaps and Detergents, Steel Plants, Food and Oil industry, Solvent Extraction Plants, Sewage, Effluent & Water Treatment, Cooling Water, Ship Yards and Marine Management, Water works, Pulp & Paper, LPG Bottling Plants, Onshore & Offshore Platforms, Slurry and Ash handling. The unit is managed by a team of qualified personel with extensive experience in the field.

VALTEC AIMS AT CONSISTENT QUALITY AND TOTAL CUSTOMER SATISFACTION THROUGH RIGID INSPECTION RESULTING IN DEPENDABILITY, RELIABILITY AND TRUST WORTHINESS WITHOUT ANY COMPROMISE. AT VALTEC YOU DO NOT HAVE TO PAY A PREMIUM FOR QUALITY..

V-Lock celebrates 30 years of being in business in 2011. V-loc was formed in 1981 to specialize in the design, manufacture and supply of high pressure equipment.

V-loc High Pressure 10k Pipe Fittings are designed as leak-free connections for process, power, instrumentation and general applications. They are manufactured to the highest quality standards and are available in broad ranges of sizes and configurations.

V-lock Pipe Fittings are standard in stainless steel. Other materials may be available upon request. Fittings are manufactured from applicable ASTM bar stock specifications.

V-lock High Pressure 10k Pipe Fittings are precision machined from bar stock. They are designed to be used for process control connections between pipe sizes.

OLIVER VALVES

Established for nearly 30 years, Oliver Valves UK is one of the premier needle and ball valve manufactures in the world.

Oliver Valves has an extensive product range offering both needle and ball valves to 10,000psi together with needle valve manifolds and close coupled manifolds.

A full range of monoflanges and slim line monoflanges, double block and bleed valves, injection valves, and sampling valves as well as distribution manifolds and instrumentation products complete the extensive range offered by Oliver Valves.

Accredited to ISO9001:2000, The Oliver Valve companies are able to offer complete component traceability across a wide range of instrumentation, pipeline valves and accessories. Comprehensive in-house satisfy both production and special testing requirements.

PRODUCTS

GATE VALVE (Forge steel)

GLOBE VALVE (Forge steel)

CHECK VALVE (Forge steel)

Y-STRAINER (Forge steel)

BALL VALVE (Forge steel)

Sizes range from 1/2" to 2".

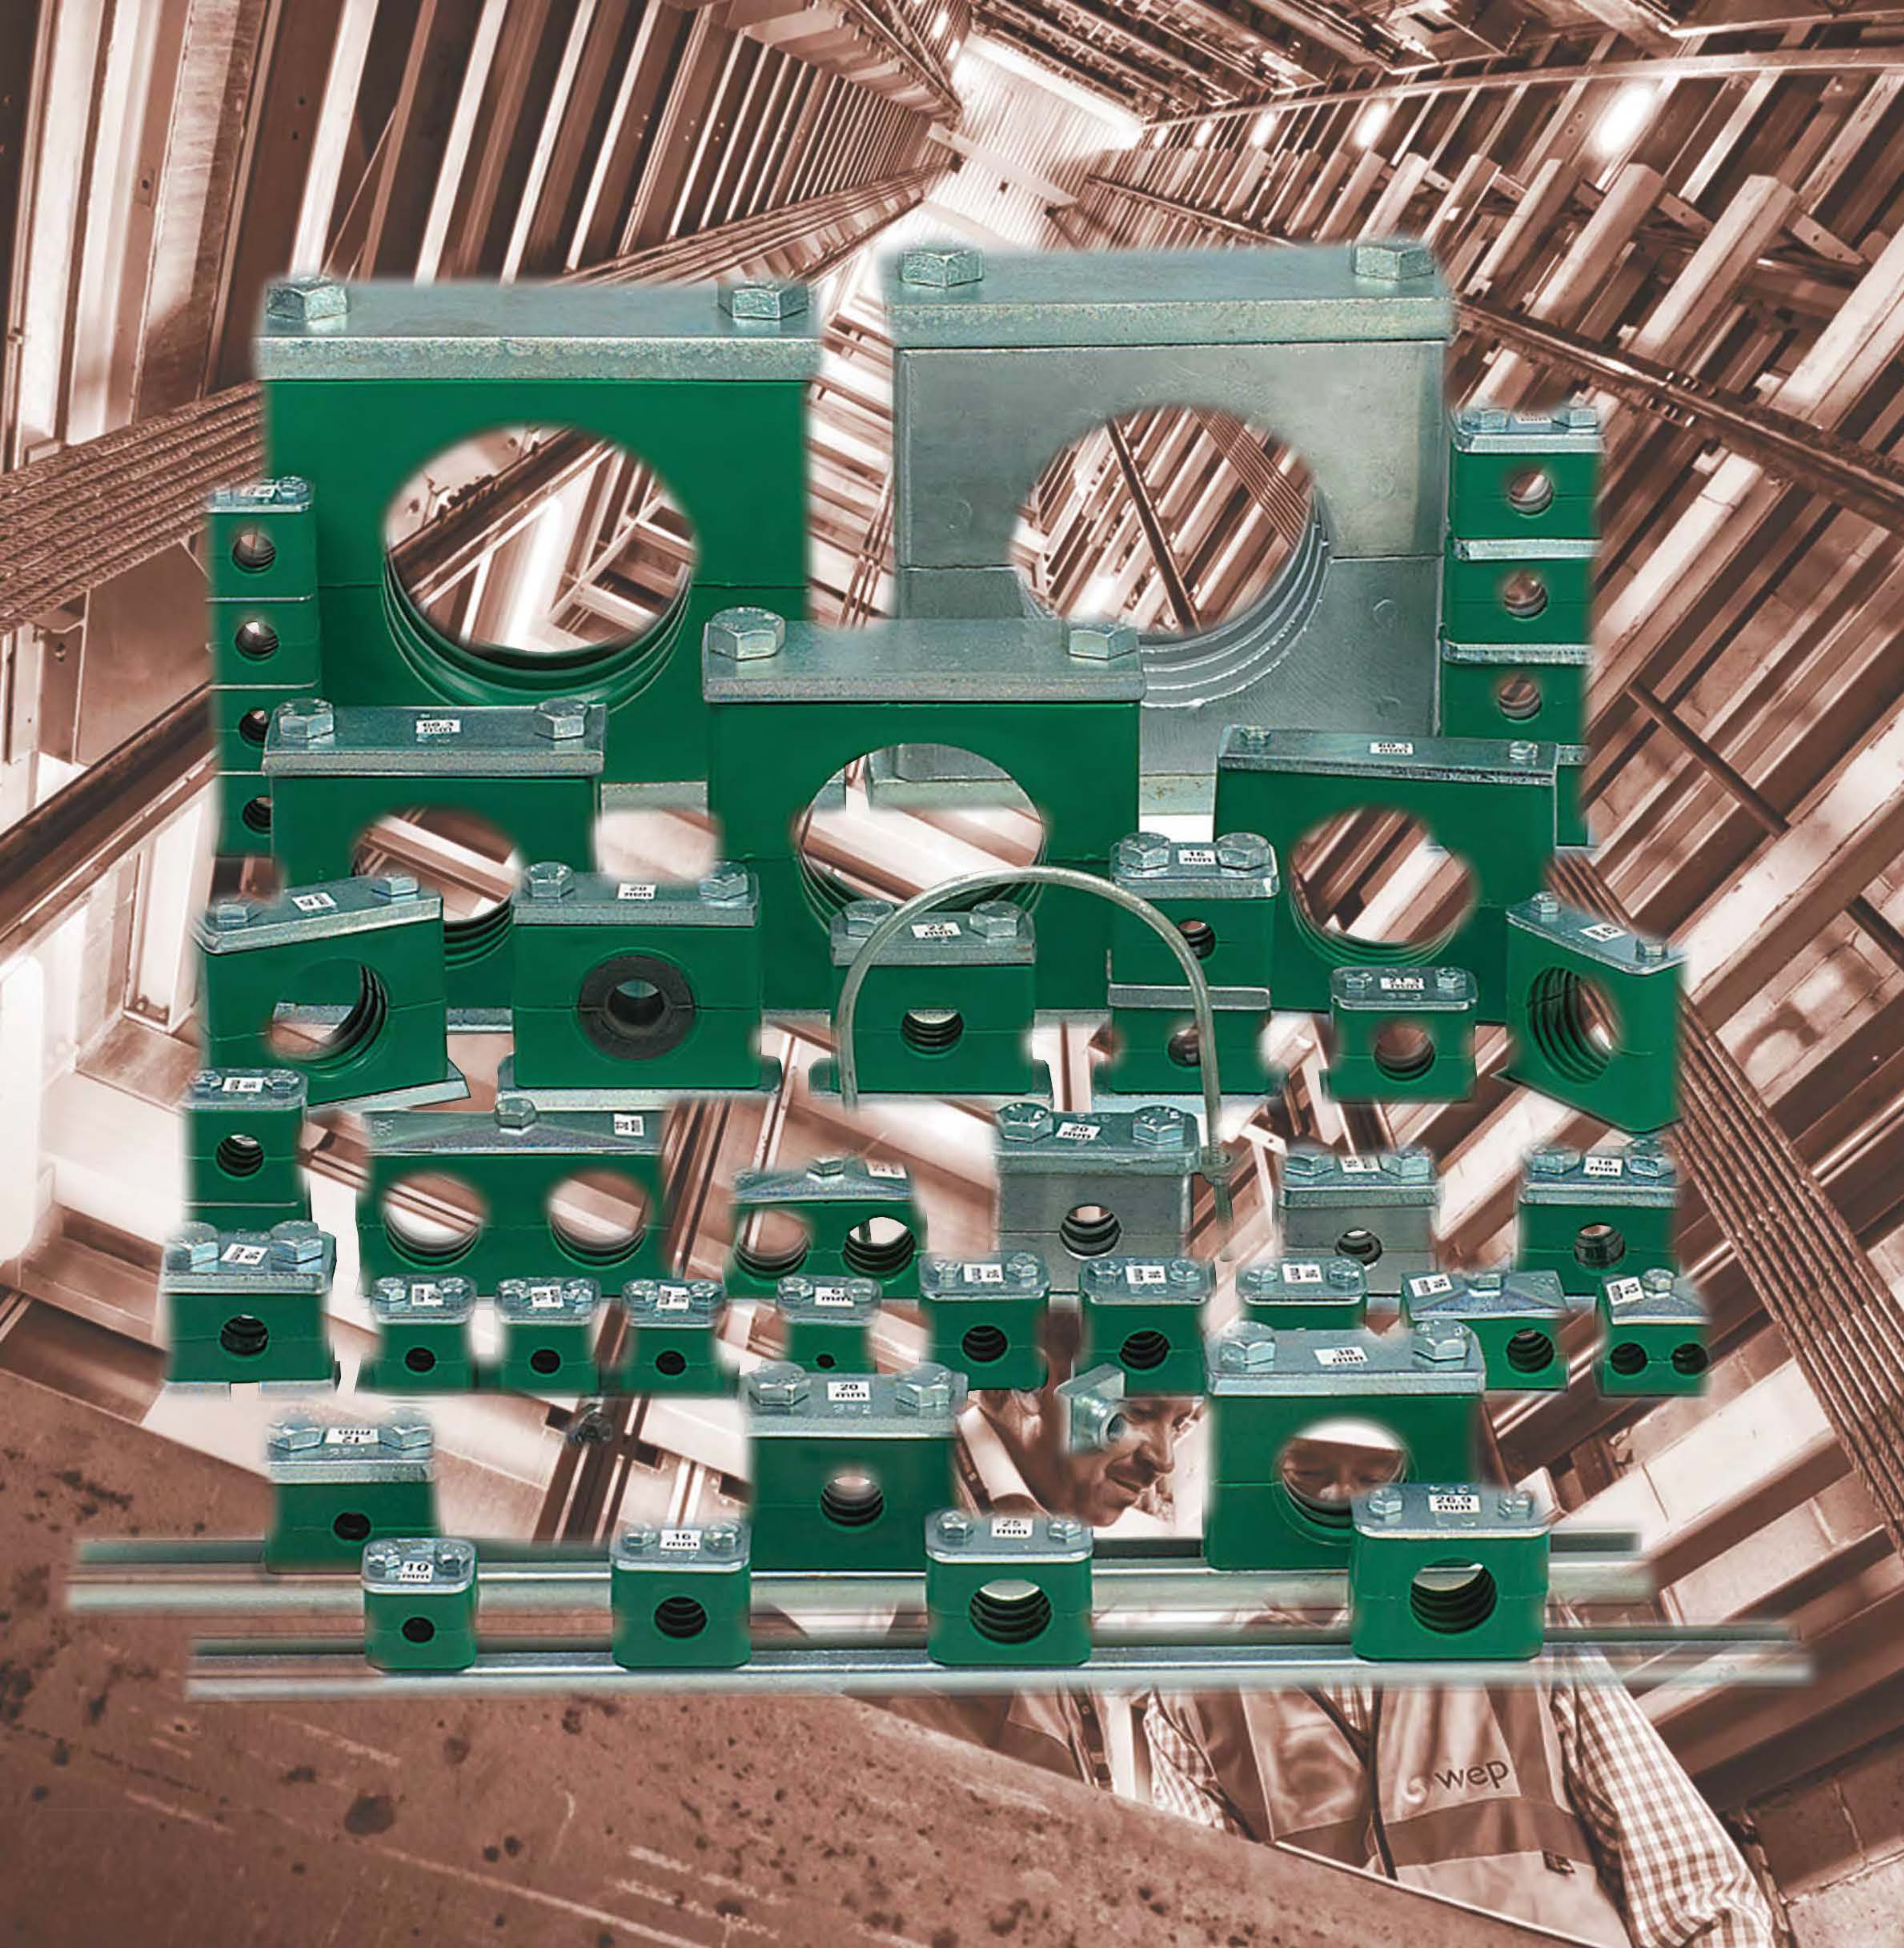

Available in Screwed end.

Pressure Rating: CL800 & CL1500

BONNEY FORGE

Bonney Forge, Italy is an integrated supplier with in-house forging, machining and assembly-test inspection operations. The forge shop contains a full line of forging equipment including billet saws and shears, billet heating furnaces and induction heaters, forge presses and hammers, trim presses and batch heat treatment equipment. All necessary support equipment including a forge die shop capable of in-house manufacture is located at this facility.

In addition, Bonney Forge is working in conjunction with machine tool builders to improve its manufacturing capabilities through a selective process of machine tool designs and purchases. Capital expenditures for forging and machining operations support our long-term growth through capacity gains and productivity. Their integrated sales, manufacturing and warehousing organization allows us to work hand-in-hand with customers, engineers and distributors to develop quality products at a competitive price.

PRODUCTS

Single Pipe Clamp

Double Pipe Clamp

Twin Pipe Clamp

Vertical/Horizontal Pipe Clamp

Available in MS, SS and Polyamide plates with Polypropylene, Aluminium and Polymide body

ALFOMEGA

ALFOMEGA vibration-dampening pipe clamps are manufactured in different series for use in many different applications. The core range of pipe clamps encompasses Standard Series, Heavy Series, and Twin Series. They meet ASTM, Shipbuilding, Nuclear, Coast Guard, and other specifications.

In addition to these main types of pipe clamps, ALFOMEGA also manufactures other clamping components and hardware. For large diameter pipes, ALFOMEGA patented Heavy Four Series offers unparalleled performance in securing and vibration dampening, as well as electrical isolation of piping from support structure. We offer plastic saddle clamps. ALFOMEGA has its roots in the metal fabrication business and we can easily manufacture customer-specific fabricated metal or injection molded products. We currently manufacture many other items for OEMs that are specially designed for that specific customer. We work closely with key personnel in the research and design stages and can make prototypes in a very short time.

WIKA

Pressure, Temperature and Level Measurement

WIKA, a family-run company founded in 1946, is a world market leader in pressure, temperature, and level measurement instrumentation. Today, WIKA's worldwide network employs more than 7,300 highly qualified and motivated professionals with immense know-how and technical proficiency. This is supplemented by our commitment to customer service and quality management to provide comprehensive solutions to improve production processes.

WIKA stands for quality WIKA's quality management system has been certified to ISO 9001. Their high quality and safety standards have even found their way into the standardization systems of many countries around the world.

Thinking globally, acting locally With WIKA's numerous subsidiaries and agencies around the world, we are familiar with country-specific requirements, standards and applications to meet the individual needs of each customer

JANATICS

An ISO 9001:2008 certified company.

Established in the year of 1977 and over 3 decades of service to the Industry. Professionally managed. The company runs on ORACLE ERP system. (E-Business suite)

R&D division approved by the Department of Science & Industrial Research (DSIR), Government of India. In house Tool room facility for manufacturing of molds and dies for castings, engineering plastic components and sheet metal components.

Exports to over 25 countries, which includes UK, UAE, USA, Mexico, Germany, Australia, Kuwait, South Africa, Italy, Saudi Arabia, Kenya, Egypt etc.

Continuous participation in International trade fairs. (Hannover, Indie (Malaysia), Milan, Chicago, Shanghai, etc.)

Member of following professional bodies
 - Confederation of Indian Industry (CII)
 - CODISSIA
 - Indo-German Chamber of Commerce
 - Fluid Power Society of India

HYDROLINE

HYDROLINE PRODUCTS commenced operations in 1982 in Bangalore, India to manufacture Oil Hydraulic Filters and Tank / Reservoir Accessories aimed at international interchangeability for mounting interface and reliability, for Industrial & Mobile applications. Our goal is to help our OEMs / Customers and Distributors succeed with the best products engineered to add value and reliability. They aim to be a strong player in the international market and a meaningful global player in our core products. Currently they export to over six continents. they believe in taking up challenges to offer custom engineered products. We work closely to understand the needs of customers and provide solutions tailor made to their specific requirements.

They are certified to ISO: 9001-2008

Air Saver Products

JORC

The JORC organization creates and develops innovative products within the scope of compressed air condensate management and air leak prevention. We are determined to become and remain your innovative and reliable partner offering true value to the compressed air industry. Innovation, creative designs, quality and reliability need commercial support to be successful.

Support covers:

- Manufacturing consistency and product reliability.
- Product quality certifications.

Specialize in a specific group of products, which are divided into the following categories:

- Condensate cleaners (oil/water separators).
- Intelligent (zero air loss) condensate drains.
- Timer controlled condensate drains.
- Motorized ball valve condensate drains.
- Multi-point timer controlled condensate drains.
- Air saving products

PRODUCTS

Elbow, Street Elbow, Tee, Cross, Union, Full Coupling, Half coupling, Reducing Coupling, Cap, Hex head bushing, Hex head plug, Square head plug, Round head plug, Bull plug, Boss, Branch outlet fitting threaded, socket weld and Buttweld end, Hex nipple, Swage nipple, Reducer insert, Pipe nipple

Size: 1/8" - 4" (6mm to 100mm)

Material: Carbon steel and Stainless steel

Pressure Rating: Threaded WOG 2000, 3000 & 6000 lbs/ Socket Weld WOG 3000, 6000 and 9000 lbs

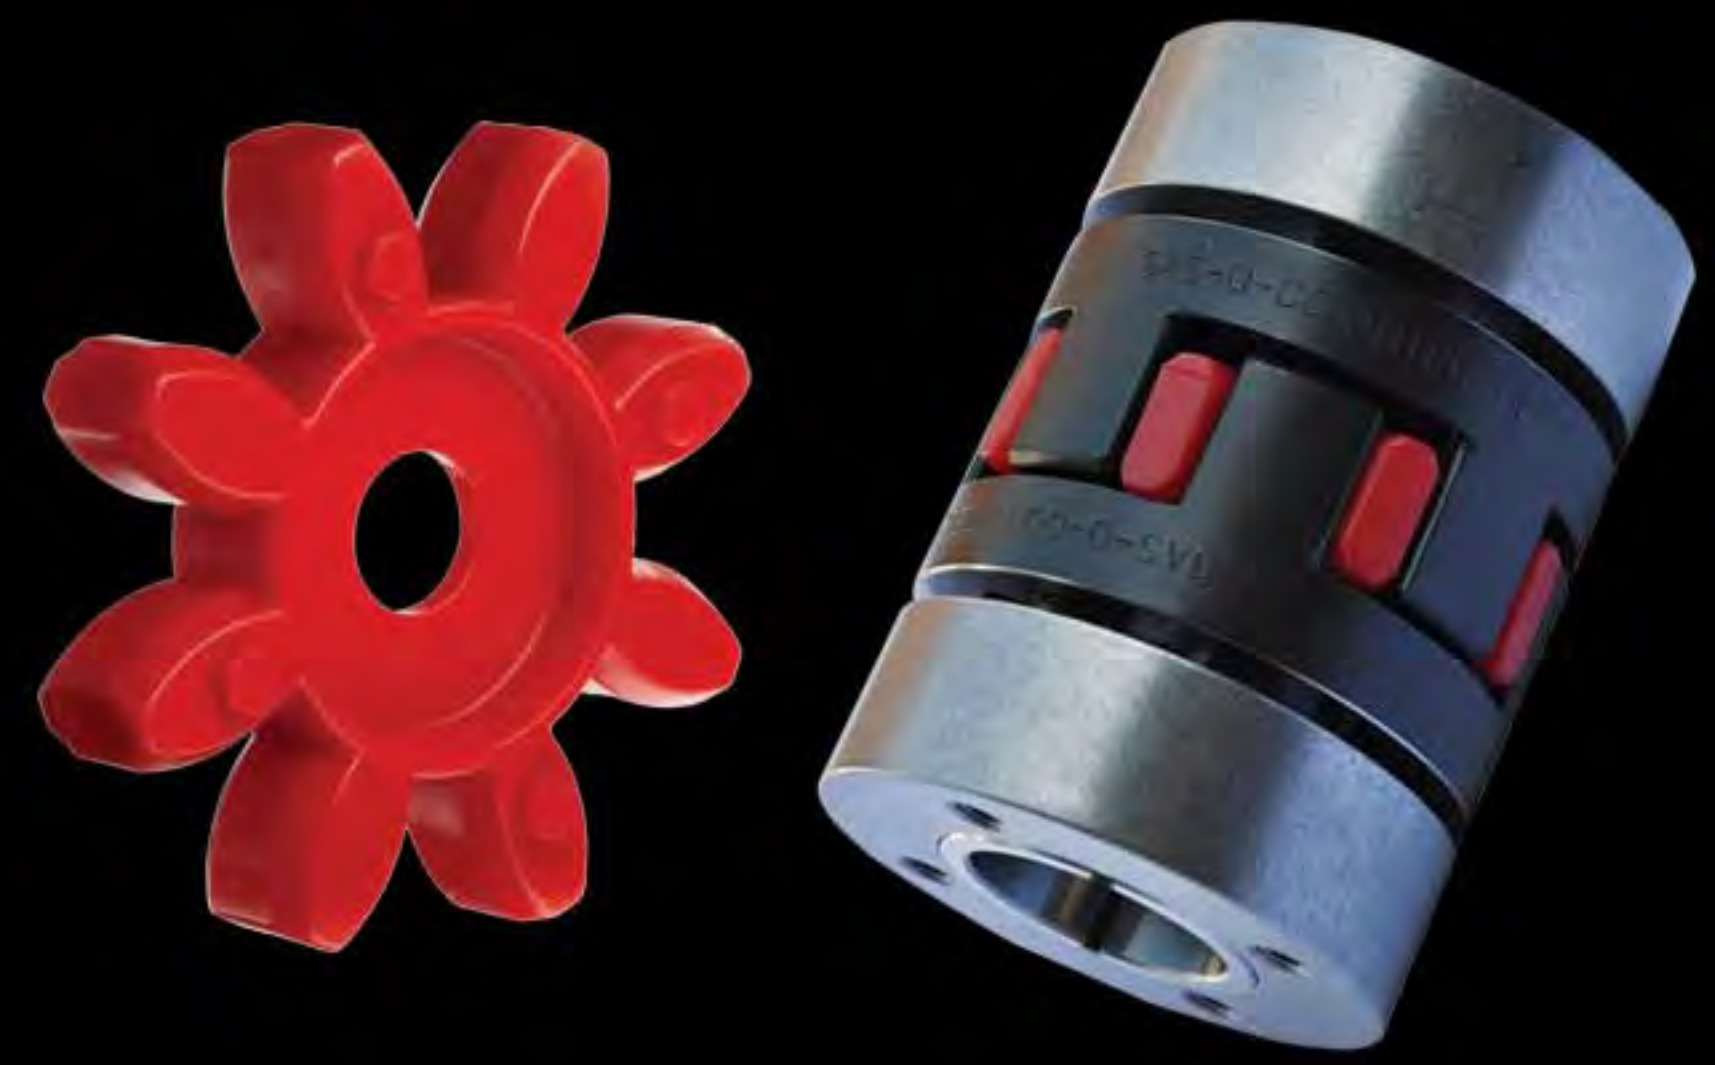

BOTHWELL

Both-Well's state-of-the-art equipment efficiently produce the highest-quality products to meet all of their customer's requirements. Operations are integrated throughout the process using production control cards from cutting of raw material through forging and automated machining.

Products strictly conform to all applicable international standards. They meet all foreign and domestic manufacturing specifications for pipeline construction.

Modern management concepts are incorporated and new trends are followed. Both-Well ensures the welfare of each employee and works to continuously improve their working environment.

BOTH-WELL TAKES THE INITIATIVE IN EXPANDING EXPORT MARKETS.
